

IntegriCo Composites of LA; a leading manufacturer of composite railroad ties; is seeking a highly motivated, results oriented Facility Maintenance Manager for its Sarepta, LA location.

Strategic Planning and Management:

- Serves as critical technical support to maximize performance and life span of IntegriCo's operational assets; technical liaison between production, engineering and purchasing.
- Develop/Implement and Manage Predictive Maintenance Program; provide equipment and process troubleshooting support; perform root cause and root cause failure analyses.
- Develop cost effective major maintenance strategy; standards for major maintenance overhauls.
- Maintain and document critical parts inventory.
- Ensure facility remains in audit-ready condition at all times.
- Administer/Supervise Maintenance Department to ensure all maintenance activity seamlessly completed; maintain records of all day-to-day maintenance/service activity; synchronize work processes with production/other departments.
- Develop and implement equipment service schedule per OEM recommendations.
- Accountable for keeping production output optimized and maintain seamless functioning of all equipment and machinery in facility.
- Supervise maintenance personnel and ensure employees perform job responsibilities to IntegriCo/OSHA standards; collaborate with EHS Manager to achieve cohesion.
- Foster culture of continuous improvement opportunity manner and at appropriate organizational level; persevere in the face of adversity; must be a change agent.

Required Qualifications:

- Technical/Instrumentation degree' BA from accredited institution in Mechanical/Electrical Engineering preferred.
- 5+ years progressive key leadership' demonstrated experience in shutdown/turn around planning and execution.
- Strong mechanical/electrical aptitude and understanding of manufacturing equipment and systems/manufacturing processes and procedures.
- Proven capability of data mining and trend recognition.
- High level of analytical ability to assess and identify potential production impediments and resolution of challenges thereof.
- Demonstrated blueprint/technical drawing literacy; ensure equipment operating to OEM design and capacity.
- Excellent organizational planning and execution skills; verbal and written communication skills, technical writing skills and computer literacy.
- Must possess the ability to convey complex technical information to other professionals; strong training ability to SOP/OEM protocols.
- Highly proficient understanding of preventative/predictive/proactive maintenance methodology.
- Unquestionable business ethics; personal integrity and moral stance to ensure subordinates conduct themselves in according with IntegriCo standards.
